Five Zero Green

We source our fabrics with sustainability in mind, our range of Five Zero Green Blackout fabrics are manufactured in a clean, CO₂ neutral production process.

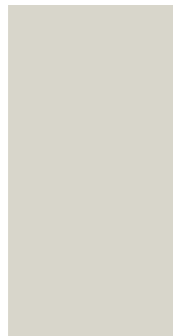

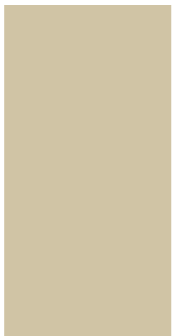

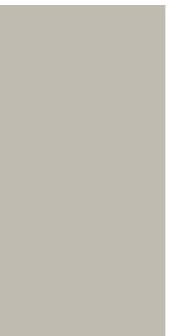

- 1. Energy** – Production process is CO₂ Neutral.
- 2. Water** – Leaves factory as drinkable.
- 3. Air** – Bio Fuels are used in a circulated closed heating system to create hot water for production processes.
- 4. Ingredients** – Materials used with the least possible impact on our health and the environment.
- 5. Waste** – Minimised using regulated manufacturing processes.

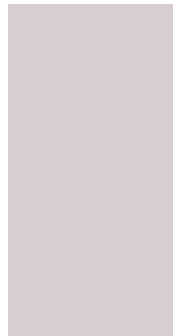

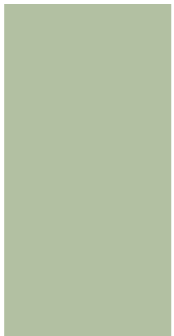

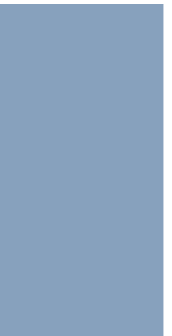

Chemical-free textiles

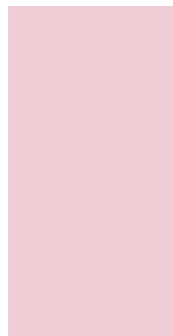

OEKO-TEX 100 certificate is an independent system that verifies that no harmful substances are used in the fabric production, this means they won't have a negative impact on human health.

- Testing includes:
- Illegal substances.
 - Legally regulated substances.
 - Known harmful (but not legally regulated) chemicals.
 - Other parameters for health care.
